

The Teaching Statement

Professor Richard Brown

Mathematics Department

October 22, 2014

What is teaching?

What is teaching?

Perhaps, it is the effective and compelling communication of your craft to those still in the process of learning.

Teaching

What is teaching?

Perhaps, it is the effective and compelling communication of your craft to those still in the process of learning.

Why teach?

Teaching

What is teaching?

Perhaps, it is the effective and compelling communication of your craft to those still in the process of learning.

Why teach?

- Service.
- Part of your growth in your own learning process.
- Pays the bills.
- Helps to attract and nurture graduate students (academic progeny).

- Part of your growth in your own learning process.
- Pays the bills.
- Helps to attract and nurture graduate students (academic progeny).

Why study teaching?

What is teaching?

Perhaps, it is the effective and compelling communication of your craft to those still in the process of learning.

Why teach?

- Service.
- Part of your growth in your own learning process.
- Pays the bills.
- Helps to attract and nurture graduate students (academic progeny).

Why study teaching?

- To get better at it.
- To enjoy it more / make the experience most fulfilling.
- To grow as a researcher.

Teaching Statements

Questions to generate discussion:

What is a teaching statement?

Teaching Statements

Questions to generate discussion:

What is a teaching statement?

Why are teaching statements even part of a application package?

Teaching Statements

Questions to generate discussion:

What is a teaching statement?

Why are teaching statements even part of a application package?

What information in a teaching statement is to be found nowhere else in your application?

Teaching Statements

Questions to generate discussion:

What is a teaching statement?

Why are teaching statements even part of a application package?

What information in a teaching statement is to be found nowhere else in your application?

How does one organize the information in a teaching statement so that it is a compelling document that adds value to your application?

The Philosophy of Teaching Statements

Teaching is mostly about effective and compelling communication

The Philosophy of Teaching Statements

Teaching is mostly about effective and compelling communication

Hence the teaching statement is your first (and only in your app) means to establish and convey your communication skills.

The Philosophy of Teaching Statements

Teaching is mostly about effective and compelling communication

Hence the teaching statement is your first (and only in your app) means to establish and convey your communication skills.

It is self-referential in its very nature:

- If your TS does not effectively communicate your ability to communicate effectively, it will show!

The Philosophy of Teaching Statements

Teaching is mostly about effective and compelling communication

Hence the teaching statement is your first (and only in your app) means to establish and convey your communication skills.

It is self-referential in its very nature:

- If your TS does not effectively communicate your ability to communicate effectively, it will show!
- If it does, it will show!

The Philosophy of Teaching Statements

Teaching is mostly about effective and compelling communication

Hence the teaching statement is your first (and only in your app) means to establish and convey your communication skills.

It is self-referential in its very nature:

- If your TS does not effectively communicate your ability to communicate effectively, it will show!
- If it does, it will show!

It is NOT a statement of facts, assignments, awards, etc. (though in context, these could be mentioned and discussed.)

The Philosophy of Teaching Statements

It is a statement of personality, style and reflection:

The Philosophy of Teaching Statements

It is a statement of personality, style and reflection:

- It aligns your goals, aspirations, revelations and epiphanies, with the events, situations and circumstances which brought you to your current state.

The Philosophy of Teaching Statements

It is a statement of personality, style and reflection:

- It aligns your goals, aspirations, revelations and epiphanies, with the events, situations and circumstances which brought you to your current state.
- It draws from your experiences, anecdotes and studies how you view the classroom, curricula and the teacher/student relationship.

The Philosophy of Teaching Statements

It is a statement of personality, style and reflection:

- It aligns your goals, aspirations, revelations and epiphanies, with the events, situations and circumstances which brought you to your current state.
- It draws from your experiences, anecdotes and studies how you view the classroom, curricula and the teacher/student relationship.

It is a place where you can talk about trends, pedagogy and experiments in the classroom in the context of your own experiences.

The Philosophy of Teaching Statements

It is a statement of personality, style and reflection:

- It aligns your goals, aspirations, revelations and epiphanies, with the events, situations and circumstances which brought you to your current state.
- It draws from your experiences, anecdotes and studies how you view the classroom, curricula and the teacher/student relationship.

It is a place where you can talk about trends, pedagogy and experiments in the classroom in the context of your own experiences.

It is a place where you can introduce and develop your personality profile (so much of your personality is on display when you teach!)

The Philosophy of Teaching Statements

It is a statement of personality, style and reflection:

- It aligns your goals, aspirations, revelations and epiphanies, with the events, situations and circumstances which brought you to your current state.
- It draws from your experiences, anecdotes and studies how you view the classroom, curricula and the teacher/student relationship.

It is a place where you can talk about trends, pedagogy and experiments in the classroom in the context of your own experiences.

It is a place where you can introduce and develop your personality profile (so much of your personality is on display when you teach!)

It is the only real free-form part of the competition....
